

Test Case 9

Purpose:

1. Verify that the Winter Theme is working as intended.

Requirement Traceability:

Requirement number appears here.

Setup:

Open the Eclipse Application.

Create a new Java Project for Eclipse.

Create a new Java Class under Project named Game, copy and paste provided code for class.

Create a new Java Class under Project named Main Menu, and paste provide code for class.

Run Main Menu class.

Follow the directions below.

Test Data:

Action	Input	Expected Output
Launch the application.		The application main GUI appears.
Set the Minutes Option to 5.	Click the textbox under the MINUTES label and enter the number 5 on the keyboard.	The textbox under the MINUTES should now display the input option.
Set the Game's theme to Winter.	Select the THEME dropdown menu, and hover over the Winter Theme.	The selection will be displayed in the dropdown menu.
Start the game.		The application should now display the game GUI with the Summer Theme.

Notes:

The Seconds, Columns, Rows, Win, Go First Options are left as defaults.
